About

Full-Stack Software Engineer with a Civil Engineering background, bringing strong analytical and problem-solving skills to software development. Experienced building end-to-end features on a production SaaS platform, including integrating REST APIs, developing responsive UIs, and collaborating with product design. Also delivers freelance full-stack web apps for independent clients.

Skills

Full-Stack Development · Javascript · Node.js · React.js · React Native · HTML · Cascading Style Sheets (CSS) · API · JSON · PostgreSQL · Database Management System (DBMS) · TypeScript · Express.js · Next.js · Project management · Agile · Git · GitHub · Software Engineering · JQuery · Scrum · UI/UX Design · Quality Assurance Processes · Engineered Standards

Work Experience

MyKitchenOps

Toronto, ON, Canada

Software Engineer

Mar 2026 - Present

Design and develop full-stack features for a production SaaS platform (React, Node.js, Supabase, Tailwind CSS) used for restaurant kitchen operations.

- Designed and built a full inventory management system: automatic stock deductions on production completion, purchase order receiving, waste logging, and low stock alerts, giving real-time visibility into ingredient levels across the kitchen workflow
- Implemented responsive layouts across the application, ensuring consistent functionality and design on mobile, tablet, and desktop.
- Diagnosed a cascade delete bug causing loss of historical order data, and proposed a data model fix to decouple order records from live recipe data, improving data integrity and long-term scalability.
- Collaborate on product decisions, UX, and system architecture through code reviews, sprint planning, and design documentation.

MyKitchenOps

Toronto, ON, Canada

Full Stack Developer Intern

Dec 2025 - Mar 2026

Collaborated with senior engineers on a production SaaS application, delivering full-stack features with React, Node.js, and Supabase.

- Refactored legacy React components to improve readability, performance, and maintainability, reducing technical debt.
- Integrated front-end components with backend APIs to support real-time data workflows.
- Tested, reviewed, and fixed full-stack bugs, ensuring correctness and UI consistency across frontend and backend layers.
- Participated in code reviews, sprint planning, and ticket-based development within an agile team.

Self-Employed / Freelance

Toronto, ON, Canada

Full-Stack Web Developer

Jun 2025 - Present

Design, develop, deploy, and maintain end-to-end full-stack web applications for independent clients using React, Node.js, Next.js, Express, and Supabase.

- Led the full development lifecycle across projects, including requirements gathering, database and API design, deployment, and post-launch monitoring with iterative improvements based on user feedback.
- Built a production e-commerce platform (earthtableco.ca) that improved client revenue by 30% within the first month post-launch through an optimized checkout flow and performance improvements.
- Built and shipped an e-commerce platform for a print/art business (kiloboyartworkstudio.com), including a custom shipping rate integration with Canada Post's API and a transactional email system.
- Worked directly with clients to translate business needs into technical requirements and functional features.

Pizzeria Libretto

Toronto, ON, Canada

FOH Restaurant Supervisor / Server

Feb 2023 - Oct 2025

Led daily operations and coordinated team workflows in a fast-paced, deadline-driven environment

- Managed high-volume customer interactions, identifying inefficiencies and improving service flow.
- Led daily operations across POS software systems, troubleshooting issues and ensuring system reliability.
- Trained and mentored staff, fostering a collaborative environment and consistent service standards.

The Simple Kitchen

Toronto, ON, Canada

Cook / Restaurant Supervisor

Dec 2020 - Nov 2022

Oversaw kitchen operations, staff supervision, and customer service, ensuring quality and consistency.

- Managed customer flow and prioritization, minimizing bottlenecks and improving overall efficiency.
- Acted as the first point of contact, guiding users through processes and setting expectations.

Grupo Projeta

Nova Lima, MG, Brasil

Civil Engineer

Jan 2016 - Feb 2019

Designed and analyzed concrete structures, creating detailed blueprints using engineering software.

- Architected and executed a quality assurance system, reducing rework by 30%.
- Analyzed and designed 200+ complex systems leveraging technical softwares (AutoCAD, TQS, Cypecad), resulting in an average of 15% reduction in material costs and demonstrating strong technical and analytical skills.

Education

Lighthouse Labs

May 2025

Diploma | Web Development

The intense full-time program covers core skills in JavaScript, Node.js, and React JS, databases, and responsive UI design using HTML, CSS, and modern tools. It also includes software architecture and CS fundamentals.

ILAC

Mar 2020

Certificate | Service Excellence for Business

PUC Minas

Dec 2015

Bachelor of Engineering (BEng) | Civil Engineering
