About

I am a Software Engineer with a background in Civil Engineering, eager to keep learning and contribute to real-world software projects. Having built end-to-end applications, I bring a solid foundation in analytical thinking and problem-solving, along with a genuine enthusiasm for building clean, functional, and user-friendly applications.

Skills

Full-Stack Development · Javascript · Node.js · React.js · React Native · HTML · Cascading Style Sheets (CSS) · API · JSON · PostgreSQL · Database Management System (DBMS) · TypeScript · Express.js · Next.js · Project management · Agile · Git · GitHub · Software Engineering · JQuery · Scrum · UI/UX Design · Quality Assurance Processes · Engineered Standards

Work Experience

MyKitchenOps

Toronto, ON, Canada

Software Engineer

Mar 2026 - Present

- Contribute to the development of a production SaaS platform for kitchen operations built with React, Node.js, Supabase, and Tailwind CSS.
- Design and implement features that translate real-world processes into scalable software workflows.
- Participate in product discussions, operational workflow design, and system architecture documentation, while collaborating through code reviews and sprint planning.
- Write and refactor production code, resolve full-stack issues, and improve system reliability, performance, and maintainability.

MyKitchenOps

Toronto, ON, Canada

Full Stack Developer Intern

Dec 2025 - Mar 2026

- Collaborated with senior engineers to design and implement user-facing features in a production-grade SaaS application.
- Refactored legacy React components to improve readability, performance, and maintainability, reducing technical debt.
- Integrated frontend components with backend APIs, supporting real-time data workflows.
- Debugged and resolved full-stack issues across frontend and backend layers.

Self-Employed / Freelance

Toronto, ON, Canada

Full-Stack Web Developer

Jun 2025 - Present

- Designed and developed end-to-end full-stack web applications using React, Node.js, Express, PostgreSQL, and Supabase, focusing on scalability and maintainability.
- Led the full development lifecycle, including requirements gathering, database and API design, deployment, and post-deployment monitoring with iterative improvements driven by user feedback.
- Implemented on-page SEO best practices including semantic HTML, metadata optimization, structured content, and performance improvements to increase search visibility.
- Built a production e-commerce platform (earthtableco.ca) that improved client revenue by 30% within the first month post-launch through optimized checkout flow and performance improvements.
- Worked directly with clients to translate business needs into technical requirements and functional features.
- Maintained version control with Git/GitHub and followed clean code and documentation practices.

Pizzeria Libretto**Toronto, ON, Canada**

FOH Restaurant Supervisor / Server

Feb 2023 - Oct 2025

- Managed high-volume user interactions, identifying workflow inefficiencies and improving user experience flows in a fast-paced environment.
- Led daily operations across POS software systems, troubleshooting issues and ensuring system reliability during peak usage.
- Coordinated team workflows to ensure timely execution, similar to working in agile, deadline-driven environments.

The Simple Kitchen**Toronto, ON, Canada**

Cook / Restaurant Supervisor

Dec 2020 - Nov 2022

- Managed user flow and prioritization, minimizing bottlenecks and improving overall system efficiency.
- Acted as the first point of contact, guiding users through processes and setting expectations, similar to front-end navigation and routing logic.

Grupo Projeta**Nova Lima, MG, Brasil**

Civil Engineer

Jan 2016 - Feb 2019

- Architected and executed a Quality Assurance system, reducing rework by 30%, directly transferable to software testing and validation practices.
- Analyzed and designed 200+ complex systems leveraging technical softwares (AutoCAD, TQS, Cypecad), resulting in an average of 15% reduction in material costs and demonstrating strong technical and analytical skills.

Education

Lighthouse Labs**May 2025**

Diploma | Web Development

The intense full-time program covers core skills in JavaScript, Node.js, Ruby on Rails, and React JS, along with automated testing, PostgreSQL databases, and responsive UI design using HTML, CSS, and modern tools. It also includes software architecture and computer science fundamentals.

ILAC**Mar 2020**

Certificate | Service Excellence for Business

PUC Minas**Dec 2015**

Bachelor of Engineering (BEng) | Civil Engineering
